## To whom it may concern

This is to confirm that our organization has been working together with GBP International on projects in China and South East Asia for strategy and procurement related issues from 2007-2009.

As such GBP was awarded with the following projects for SMS Mevac after a thorough tender process which was won by GBP against international competition:

- Conduct an in depth analysis of the Chinese market for steel mills and secondary metallurgy processes including strategy recommendation
- Conduct supplier analysis & supplier audits and production supervision until final commissioning for fabricated products to be used in one of our international projects

GBP International was well positioned to deliver extremely valuable and professional services and we were very satisfied with the results provided by GBP International. As such we highly recommend the services offered by GBP to any third party and would be pleased to provide reference to GBP.

We would not hesitate to work with GBP again in future if any needs arise.

We wish GBP International all success in their future business.

Yours sincerely

SMS Mevac GmbH
